SKILLSET:

Technical:

Flutter
Git
Docker
Python
C, C++
Java
HTML
GO

Soft Skills:

Collaboration
Scrum
Agile
Communication
Problem-solving
Adaptability

EDUCATION

Black Forest Academy	Kandern, Germany
California Baptist University	Riverside, CA

Bachelor of Science in Computer Science

Expected Graduation: April 2026

WORK AND PROJECT EXPERIENCE

YoIntern, FlexSnap PROJECT

During my capstone at California Baptist University, I collaborated with team members to create IOS and Web applications. My primary IDE being Visual Studio Code, I developed some of the following skills:

- Developed aspects of data management for YoIntern using Firebase. As backend programmer and AWS EC2 operator I am somewhat experienced in Amazon-Linux web hosting.
- During my time working on FlexSnap, I was responsible for developing the functional exercise challenges aspect of the app. Creating one of the most important functions of the FlexSnap vision.
- Collaborated closely within a dynamic team of five members on both projects.
- While developing FlexSnap, I used Flutter and Xcode, while emulating the IOS operating system.
- During the development of YoIntern, I mostly worked with Flutter and Dart.

2024 (ended school project)
